Your Score Report

STALNAKER, JACK J

GRADE: 04

CLASS/GROUP NAME:

PROGRAM NAME: CENTER FOR BRIGHT KIDS

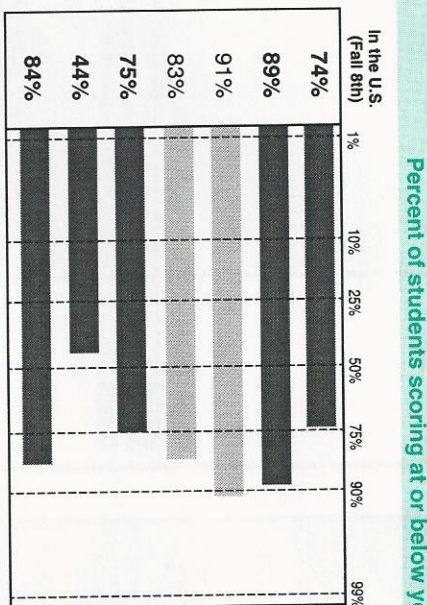

SCHOOL CODE: 98000956

TEST FORM: 06B

TEST DATE: January 2015

Your Scores

	Score Range (1-25)
Composite Score	17
English	20
Usage/Mechanics (1-12)	10
Rhetorical Skills (1-12)	09
Mathematics	17
Reading	13
Science	19

EXPLORE Test Scores range from 1 (the lowest score you can receive) to 25 (the highest score you can receive). Your Composite Score is simply the average of the English, Mathematics, Reading and Science Test scores, rounded to a whole number.

The two scores directly under English, called "subscores," range from 1 to 12. They tell you how well you did in two specific areas of English:

- Usage/Mechanics--punctuation, grammar and usage, and sentence structure
- Rhetorical Skills--your understanding of the use of strategy, organization, and style in writing

These scores added together do NOT necessarily equal your English Test score.

Next to each of your scores you can see the percentage of students in a comparison group that scored at or below your score. These are called "norms." You took EXPLORE in order to see how your skills compare to students in a higher grade, in this case, students who took EXPLORE in the fall of eighth grade. If you earned a score at the 65th percentile, it means that you did as well as or better than 65 percent of these eighth graders.

The bar graph of your norms helps you to see which of your scores and subject areas are strongest and weakest. Very few students are equal in all subject areas.

Turn this score report over to see a description of the skills and knowledge you have probably already developed, based on your scores in each of the subject areas. You will also find some ideas for continuing to build your skills and knowledge in important ways. It's a good idea to discuss these ideas with your teachers and parents.
